

Armrest options

Flexibility and high-quality care delivery is at the core of what we do. Our range of armrests has been designed to make conducting different procedures and care needs easier.

All armrests are removable to simplify side transfers, and give easy access for wound dressings or incontinence changes.

Available on
both the S4500
series and R3900
series

**No Meal Tray
Arm (NT)**

Sleek design and easy to clean.

**Standard
Removable Arm
(SR)**

Removable armrest with provision for meal tray attachment.

**Procedure
Arm (PA)**

Designed for comfort and simple procedure administration.

Drop Arm (DA)

Drops down to make side transfers easier. Only armrest which drops down to change height.

**Procedure Tray
Arm (PTA)**

Tray is level, flat and soft
Ideal choice for cannulation and clinical based therapies. There is also a small activity surface.
